

*ECLIPSE: Phono Amplification specifically an MC cartridge with a 2.0 millivolt output. Do I have any options with the Eclipse? Must I purchase a separate phono amp to achieve a level suitable for the Eclipse or is there an internal board option.*

*Thanks for any guidance on this.*

*Signed*

*A well satisfied customer!*

Hello Mr. Noble,

we have a development order from our nederland importer for a new phono pre amplifier. We have to deliver in the next 2 - 3 month. The unit can handle mc and mm and have two pairs PCS inputs in SE technologie and RCA and XLR fake outputs. Its unit looks like an Eclipse.

We have four selectors on the front:

input 1 or 2

impedance selector between 75, 125, 250, 500 and 47Kohm

capacitor selector

output gain selector

the unit has NOT a mc/mm selector - its not necessary. The electronic design is a mix by IC and tube electronic - its a hybrid amp.

Please ask me in 4 weeks for more details.
